The screenshot shows a terminal window with a dark background and light-colored text. At the top, there's a menu bar with "Activities", "Applications", "Places", and "Terminal". The title bar of the terminal window says "Terminal". The terminal itself displays the command "amnesia@amnesia:~\$ ls -al" followed by a list of files and directories in the current directory. The list includes various system files like ".bash_logout", ".bashrc", ".cache", ".config", ".Desktop", ".Documents", ".Downloads", ".electrum", ".gnome2", ".gnome2_private", ".gnupg", ".local", ".mkshrc", ".mozilla", ".Music", ".Pictures", ".poedit", ".profile", ".Public", ".purple", ".su-to-rootrc", ".Templates", ".tor", ".tor-browser", "'Tor Browser'", ".Videos", and ".xsessionrc". There are also entries for "amnesia" and "root". The file sizes and last modification dates are listed next to each entry. The command "amnesia@amnesia:~\$" is visible at the bottom of the terminal.
